Office of Infrastructure Protection

2009 Critical Infrastructure and Key Resources Learning Series

The popular Webinar series continues with current topics and issues of interest to owners and operators of the Nation's Critical Infrastructure and Key Resources (CIKR). This important series provides the tools, latest trends, issues, and best practices within the infrastructure protection arena.

Who should attend – This web-based seminar will be particularly useful to those CIKR partners who have incident related responsibilities: Operations, emergency, and continuity of operations managers/planners as well as others who coordinate the protection and restoration of critical infrastructure within the context of the National Response Framework.

CHRIS ANDERSON

Director, Contingency Planning
and Incident Management
Division, DHS Office of
Infrastructure Protection

Fifth in the series:

2009 Hurricane Season: A Readiness Guide for Critical Infrastructure Partners

June 23, 2009 | 2 p.m. to 3 p.m. ET

With the onset of the 2009 Hurricane Season, CIKR partners are working together to be prepared and ready to quickly respond and restore operations. As part of the DHS Hurricane Preparedness Month, Mr. Chris Anderson, will discuss coordination processes that are currently in place for the 2009 hurricane season. Mr. Anderson will discuss the most current information on the capabilities the DHS Office of Infrastructure Protection has established to ensure CIKR owners and operators receive timely and accurate responses to requests for information or assistance. The Webinar will also cover national level CIKR reporting; CIKR capabilities & field level staff support; and the various tools (modeling, simulation, GIS, impact imagery) that are available to enhance critical infrastructure preparedness and response.
